

DESIGN TO SHINE UNIT 7 SUPPLY LIST

See my handy one-stop Amazon shopping list at makeracademy.com/unit7list

- 10+ sheets of white or light 12" x 12" 65 lb. cardstock -- the lighter your cardstock, the more light will shine through your layers
- Clear adhesive 3D Zots or strips of foam core
- Cricut cutting machine (Joy, Explore, or Maker)
- Green StandardGrip machine mat (12" x 12" for Explore/Maker, 4.5" x 12" for Cricut Joy) – you will still need a mat for the Explore 3 and Maker 3
- Fine point blade
- Ruler, Weeding Tool, Spatula, Craft Knife, Brayer, Tape
- Shadow Box Frame (as big as 12" x 12" for Explore and Maker users, and as small as 4" x 4" for Joy users) – you only use this if you also plan to use LED tape lights
- (Optional) LED tape light strip, about 8-16 feet (you can get them from Amazon, Lowes, Menards, and other home improvement stores). Look for one that has a power supply integrated into it, or some other built-in way to power it (like a USB plug). Note: You can use fairy lights if you wish BUT they will glow inconsistently behind your design, unlike an LED tape light strip that will show your design off more evenly.
